

中国石油天然气股份有限公司
PetroChina Company Limited

China National
Petroleum Corporation
(CNPC) is a world-
leading integrated

international energy company with businesses covering oil and gas upstream and downstream operations, oilfield services, engineering and construction, petroleum materials and equipment manufacturing and supply, capital management, finance and insurance services, and new energy operations.

CNPC's core global business is composed of three sectors:

Oil & Gas Operations

- ◇ **Upstream:** Oil and gas exploration, development and production
- ◇ **Midstream:** Construction of pipeline, storage and transportation facilities, natural gas marketing and LNG projects
- ◇ **Downstream:** Refining and marketing, crude oil and oil products trading and transportation
- ◇ **Chemicals:** Base chemicals, petrochemicals, fertilizer and specialties

Field Services, Engineering & Construction

This sector includes geophysical prospecting, well drilling, well logging, field surface engineering and pipeline construction.

Petroleum Equipment

This sector includes the manufacturing and supply of oil and gas exploration equipment, drilling and production equipment, storage and transportation equipment, refining and chemical equipment, and oilfield chemicals.

CNPC, China's flagship energy enterprise, plays an important role in China's oil and gas production and supply.

- ◇ Oil production: 2.75 million barrels of crude oil/day
- ◇ Gas production: 5.6 billion cubic feet/day

- ◇ Gas production: 5.6 billion cubic feet/day
 - ◇ Oil reserves: 3.06 billion metric tons
 - ◇ Gas reserves: 2,320.1 billion cubic meters
- Oil and gas production account respectively for 57.7% and 78.3% of China's total output

CNPC — a global player

- ◇ Oil and gas assets and interests in 27 countries

CNPC — one of the largest technical and engineering service suppliers

- ◇ Entire oil and gas operations, oilfield services, engineering and construction, as well as integrated resolution schemes
- ◇ World famous contractor and service supplier in seismic exploration, well drilling, well logging, pipeline and engineering construction

CNPC — a major petroleum material and equipment manufacturer

- ◇ Manufactures materials and equipment required by each sector of the petroleum industry, including oil and gas exploration, development, production, storage and transportation, and petrochemical facilities.
- ◇ Products sold in 69 countries and areas worldwide.
